

Smarthinking

Smarthinking is an assignment feedback service that is available for all units at NCPS. The Smarthinking online writing centre allows students to upload a draft assignment and the assignment question. You will receive detailed, personalised feedback on your assignment from a professional online tutor within 48 hours. Students with access to the service can submit up to 5 drafts per term.

Please note that Smarthinking does not edit or correct your work; instead it aims to assist you to improve your academic writing skills. In addition, Smarthinking tutors are experts in broad disciplines, but not in specific units offered at NCPS, so this service does not replace the marking or feedback provided by your educator.

How to access Smarthinking

Smarthinking is available from within the online class space.

1. Log in to the Student Portal and go to your unit's online class space.
2. Click on the "Smarthinking assignment feedback service" link.
3. You will then be taken directly to the Smarthinking website. More information about navigating Smarthinking can be found in the Smarthinking User Guide.
